

ACCELERATING COMMUNITY-LED CONSERVATION IMPACT ACROSS AFRICA

The Vuma Conservation Fund is a new **\$65 million pooled fund** built by and for African conservation organizations, designed to unlock climate resilience, biodiversity protection, and stronger livelihoods by providing multi-year, unrestricted funding aligned to local partners' own strategies, alongside built-in organisational development support.

The model is intentionally high-efficiency for funders: **one vehicle, multiple, field-shaping outcomes** - backing local institutions (not fragmented projects), with clear accountability and low transaction costs, and a mutually reinforcing portfolio that multiplies impact.

SCALING REACH & IMPACT

71
MILLION

- and growing - hectares of biologically and culturally diverse landscapes and seascapes where these organizations are currently working to support community rights, benefits, and stewardship.
